

# Course Project

## **Contact Manager**

# Project Description

## Registration and Login

- As an user I will be able to register my self in the contact manager application. If I am an existing user it should throw me error saying that I am already an user and can able to login with user name and password

The fields for registration can be the following

Full name

Email

Password

Confirm Password

- As an existing user I will be able to login to the application with the user name and password

The fields for login will be following

Email

Password

## List of Contacts

Contact List will have the Contact Name, Contact Email , Contact Phone and Type of Contact for the contacts. If the image is available then images should show up. There will be an option to search a particular contact by email or by phone. You can edit and delete contacts

## Create Contact Form

Contacts can be added by submitting the data into the form

The form fields can be

- Contact name
